Many thanks, Betsy. I will pass this along to Waste Committee members. As I will be out of the country next week and the following one, I will ask that members respond directly to you.

Best,

Lia

Subject: CCR Permit Program Draft Guidance -- for Review

Dear Lia and Kerry

Attached is the current draft of the CCR State Permit Program Guidance Document for review.

As before, we would ask that this be shared only with State personnel. There will be a period for public review/comment later but at this stage we want to make sure that we have addressed State comments/concerns. Also, as we note in the introduction, we believe the “guidance” will evolve over time as issues arise and both EPA and the States work through them. As we have done with the CCR rule, our current thought would be that we would add questions and answers as appropriate.

We would really appreciate comments by next Wednesday May 24th – we know this is very tight. We can arrange a call for next week if that is the better way to get your comments or additional questions.

Again, thank you so much for all your efforts working with us so far and I look forward to continue working with you! Please feel free to call me if you have any questions or concerns.
